## **DETAILED ACTION**

### ***Allowable Subject Matter***

Claims 1-20 are allowed.

The following is an examiner's statement of reasons for allowance: the spinal implant with first and second baseplates and ball and socket structure there between was found novel. The first base-plate having a post with a ball-head at an end of the post and extending toward the second base-plate inner surface that has a convex structure with a central bore for the ball-head. The first baseplate having a concave inward surface and the second baseplate having a cap integral with the outward lying surface having a spring loaded therein. The prior art did teach two baseplates with a post and ball-head on one base-plate and a socket on the second base-plate. However, the prior art failed to teach a concave inward baseplate and a ball captured in a bore in the convex structure of the second baseplate with a spring-loaded cap.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Brian E. Pellegrino whose telephone number is 571-
